

Tatung and Magnetic's Partner to Provide Enabl3D™ technology to the Casino and Digital Signage Marketplace. Introducing Triview's (L42MD503DW73A).

Long Beach, CA- November 2008

Tatung is proud to announce today that the Company has joined Magnetic's "Enabl3D™ Partner Program" as an Official Integration Partner and will be launching its own line of Triview™ products featuring Magnetic's Enabl3D™ technology at G2E this November. Tatung is excited about the opportunity to offer Enabl3D displays to its clients. The Enabl3D™ solution is a combination of technology that modifies standard LCD's displays enabling viewers to experience 3D video content without the aid of any special eyewear.

"Magnetic's Enabl3D technology is truly the next generation digital signage solution and it seems the casino industry has really hit the jackpot this time with a solution that promises to be a double threat by both enhancing the customer experience and still raising awareness of featured promotions said John Sherry, National Accounts & Marketing Manager USA & Canada.

"We are thrilled that Tatung has joined the Enabl3D Partner Program and will be integrating our technology into their display products, said Magnetic Chief Technology Officer, Tom Zerega. Working with a strategic partner such as Tatung offers Magnetic tremendous opportunity in the casino and digital signage marketplace. Following the excitement this summer of our Enabl3D installation at the Borgata Hotel & Casino in Atlantic City, we anticipate even greater success through our partnership with Tatung."

About Magnetic Media Holdings

Headquartered in New York City, Magnetic is an end-to-end solution provider of 3D Digital Media products and services. The Company has developed a technology that modifies standard manufacturers' LCD's displays and content management software, enabling them to show 3D video content which can be viewed without the aid of any special eyewear.
